

HEALTH & SAFETY SERVICES

NGE works closely with clients across a variety of industries to help reduced risk, comply with regulations, and develop a comprehensive safety management system. NGE listens closely to each clients' unique safety and health challenges. We then combine our tenured resources across many consultative disciplines to provide you with the best, most responsive solution within your required time frame.

Our capabilities include:

SAFETY MANAGEMENT SYSTEMS

NGE provides customized assistance to either develop and implement or, simply improve upon, your organization's entire safety and health management system. This process usually begins with a detailed safety and health audit of policies, programs, record keeping, training records, and loss data. The results of this audit are then utilized to develop a detailed plan of action to improved safety and health performance which will dramatically impact your organization's bottom line.

SAFETY AND HEALTH PROGRAM DEVELOPMENT AND IMPLEMENTATION

NGE develops customized policy and procedures manuals that meet regulatory and contractor pre-qualification requirements. Whether you need a program developed from scratch, have existing programs that are in need of major or minor revisions, or need to merge multiple manuals into one corporate-wide standard, NGE will work

with you to develop the exact safety and health program that you require. We will then assist you with implementing your program to maximize your organization's return on investment.

COMPLIANCE ASSISTANCE AND AUDITING

NGE's experienced staff have extensive backgrounds in regulatory compliance and industry best management practices. Audits provide an effective and efficient snapshot of how well your safety program is being implemented within your organization. We will conduct a safety inspection onsite to determine potential OSHA violations. We will also audit your company's documentation including the health and safety recordkeeping and programs, training records, and injury and illness logs. Upon completion, your company will receive a detailed report that indicates any deficiencies and recommendations for improvement. NGE will then partner with you to assist with corrective actions.

SAFETY AND HEALTH TRAINING

NGE's Health & Safety staff has trained thousands of workers on safety and health topics such as respiratory protection, confined space entry, powered industrial trucks, trenching & excavating, OSHA 10 & 30 hour, SafeLand, Defensive Driving and many more. Our safety training integrates real-world experience, engaging training content and extensive knowledge of the regulations to ensure the training delivered meets all of the regulatory requirements and gives your workforce the knowledge and skills they need to work safely.
