

ENVIRONMENTAL REMEDIATION SERVICES

NGE provides you with a single-source solution to your complex environmental problems such as soil and groundwater cleanup, site remediation, and environmental construction.

At NGE, we can provide an experienced in-house staff who are 40-hour OSHA trained, specialized equipment, and construction equipment operators to complete a wide range of projects through a successful and timely conclusion. We can provide innovative, cost-effective solutions to your environmental construction and remediation problems with the hands-on project management you expect when you team with NGE.

NGE can provide and manage the following services:

- Environmental Remediation System Construction
- Earthwork and Site Restoration
- Excavation of Contaminated Soils
- Soil & Groundwater Treatment Systems
- Remedial System Operation & Maintenance
- Aboveground and Underground Storage Tank Management
- Facility Decontamination & Demolition
- Hazardous Materials Abatement
- WWPT Sludge Cleanout
