

Annual Toxic Release Inventory (TRI) Form R

Reports are Due on July 1

The deadline to file
your annual TRI Form R
is approaching, so you
want to beware of
changes for RY2019.

June 7, 2018:

EPA Finalized a rule that adds
a category of 13 nonylphenol
ethoxylates (NPEs) to Toxics
Release Inventory list of
reportable chemicals.

Nonylphenol Ethoxylates (NPEs):
nonionic surfactants used in
adhesives, wetting agents,
emulsifiers, stabilizers,
dispersants, defoamers,
cleaners, paints and coatings.

The rule is effective for
2019 TRI reporting year
with the 2020 submittal
due on July 1, 2020.

The National Defense
Authorization Act for Fiscal
Year 2020 added certain Per-
and Polyfluoroalkyl Substances
(PFAS) to the TRI list.

These chemicals are
subject to TRI reporting
requirements for RY 2020,
with TRI reporting forms
due by July 1, 2021.

If your facility utilizes any
of these chemicals, begin
collecting data this year
for future purposes.

If you have questions or
require assistance with TRI
(FORM R), NGE has experts
in TRI threshold evaluations,
release calculation
development and reporting.
